Deepika Sewwandi Deepika Sewwandi Portfolio

PROFILE

Software Engineer with 6 months of industry experience in full-stack web development using Laravel, React.js, Next.js, PHP, JavaScript, and MySQL. Recently completed a BSc (Hons) in Computing and Information Systems from Sabaragamuwa University of Sri Lanka. Experienced in developing responsive web applications, RESTful APIs, database-driven systems, and business-focused software solutions. Hands-on experience with MVC architecture, AJAX, Git, Agile development, and modern frontend frameworks through industry experience and academic projects. Passionate about building scalable, user-focused applications and continuously developing technical expertise through practical software engineering.

PROFESSIONAL EXPERIENCE

Software Engineer Intern February 2025 – August 2025
CodeAisys IT Solution - Matara Matara, Sri Lanka

- Developed and maintained full-stack web modules using Laravel, React.js, Next.js, PHP, JavaScript, and MySQL.
- Implemented CRUD functionality, RESTful APIs, database operations, and AJAX-based features for business applications.
- Built responsive and reusable interfaces using React.js, Blade, SCSS, Bootstrap, and CSS.
- Integrated frontend components with backend APIs and optimized data flow for reliable application functionality.
- Worked with MySQL databases, including data management, querying, and application-level integration.
- Participated in Agile development workflows, sprint-based development, Git version control, code reviews, debugging, and collaborative problem solving.
- Contributed to application testing, troubleshooting, bug fixing, and refinement of existing modules before release.

EDUCATION

BSc (Hon) in Computing and Information System August 2022 – August 2026 | Belihuloya
Sabaragamuwa University of Sri Lanka

GCE A/L Examination in Physical Science Stream 2017 – 2020 | Matara
M/R Sujatha Vidayalaya | Matara

PROJECTS

Vehicle Rental Application | Individual (Ongoing) Present
React.js | *CSS* | *JavaScript* | *Laravel* | *AJAX* | *Gemini* | *Bootstrap* | *PHP*

- Developed a full-stack system for managing JCB rentals, allowing customers to request vehicles for work sites, with automated email notifications and integrated payment gateway.
- Designed the admin dashboard to manage drivers, vehicles, and monthly invoices, streamlining operations through an optimized Laravel-React architecture.

Resource Reservation Management System 2026
Next.js | *React.js* | *TypeScript* | *PostgreSQL* | *Prisma ORM* | *CSS*

- Developed a full-stack web application with resource management, image uploads, and separate user and administrator interfaces.
- Implemented a reservation system with real-time availability checking and booking conflict detection.
- Built REST APIs, administrator authentication, and database operations using Prisma ORM and PostgreSQL.

Skill Recourse Management System 2026
React | *Node.js* | *Express.js* | *MySQL* | *Sequelize* | *JavaScript* | *Axios* | *React Router*

- Developed a full-stack resource management platform for managing personnel, projects, skills, proficiency levels, and assignments.
- Designed and implemented RESTful APIs using Node.js and Express.js with MySQL and Sequelize.
- Developed an automated skill-matching mechanism that evaluates personnel proficiency against project skill requirements.
- Built a responsive React.js interface with reusable components, API integration, routing, and structured frontend state/data handling.

Restaurant Management System | Induvidual 2025

Laravel | PHP | MySQL | HTML | CSS | JavaScript | Bootstrap | Blade | AJAX

- A full-stack Restaurant Management System featuring menu management, dynamic cart functionality, and order processing, designed to streamline restaurant operations and enhance customer experience.
- Collaborated across front-end and back-end layers using MVC architecture to deliver optimized workflows, ensuring maintainable code and smooth system operations.

TECHNICAL SKILLS

Programming Languages & Web Technologies
C | HTML | CSS | SCSS | JavaScript | Java | PHP | AJAX | TypeScript

Frameworks & Libraries
Laravel | Node.js | React.js | Next.js | Tailwind CSS | Bootstrap

Databases and Query Languages
MySQL | MongoDB | PostgreSQL | SQL

Tools and Platform
VS Code | Git | GitHub | Postman | Trello | Canva | Lucidchart | Microsoft Suite | Microsoft Power BI | Figma | Photoshop | Wireframing | ClickUp

Technical Concepts
Object-Oriented Programming (OOP) | RESTful APIs | CRUD Operations | MVC Architecture | Authentication & Authorization | Data Structures & Algorithms | Agile Methodology | Software Development Life Cycle (SDLC)

ACADEMIC RESEARCH

AI-Driven Gamified Framework for Personalized and Stress-Free Coding Education August 2025 – August 2026

Sabaragamuwa University of Sri Lanka | Final-Year Undergraduate Research

- Designed a conceptual framework combining AI personalization, gamification, learning analytics, real-world coding tasks, and learner well-being support.
- Conducted research with 134 undergraduate computing students and 64 academic/industry experts and analyzed findings using Excel and Jamovi.
- Investigated adaptive learning factors including coding performance, errors, retries, hints, learning time, motivation, engagement, and stress.
- Developed a Figma UI prototype demonstrating personalized learning pathways, gamification, progress analytics, coding challenges, and learner-support features.
- Applied Self-Determination Theory, Flow Theory, Constructivism, and Cognitive Load Theory to inform the proposed framework.

SOFT SKILLS

- Quick Learner
- Communication
- Leadership
- Problem Solving
- Interpersonal
- Team Works
